

said batter [said machine] and dynamic braking means for rapidly decelerating the speed of said at least one propulsion motor.--

Please amend claim 32 as follows:

-- 32. (Amended) The ball throwing machine of claim 31 including at least two linear actuators for [moving said power head] adjusting the position of said machine to control the [in a horizontal and a] trajectory of said propelled balls [direction].--

Please amend claim 33 as follows:

-- 33. (Amended) The ball throwing machine of claim [31] 32, further including a programmable controller for controlling the movement of said at least [one] two linear [actuator] actuators.--

Please amend claim 34 as follows:

-- 34 (Amended) The ball throwing machine of claim 31, wherein said machine includes a power head [includes] having a center pivot about which the power head is pivoted.--

Please amend claim 35 as follows:

-- 35 (Amended) The ball throwing machine of claim [31] 34, wherein said power head includes at least one rotating wheel powered by at least one propulsion motor for propelling [a ball] said balls toward [a] said batter.--
